#### RAYS FROM THE SUN.

They Become Light to Us Only Upon Striking Our Atmosphere.

The rays of light that reach us from the sun are not light in themselves. For instance, to show what is meant, suppose you were placed out in empty space, facing so that you would look sidewise at the light rays passing from the sun to the earth. You would not see them at all. You could only see them if you looked directly at the sun so that the rays would enter your eyes and, striking upon the retina, produce there the impression of light.

The rays passing by and not enter ing your eyes would be invisible be cause in open space there is no me dium like the atmosphere to scatter the rays in all directions and thus produce an illumination all around.

The sky at night is full of passing sunbeams and star beams, a vast and inextricable web of radiations, but they lie beyond the limits of the atmosphere, and only those are transformed into light which by reflection from a planet in the case of sunbeams or by coming straight into the eye from a star directly affect the nerves of vision. -Garrett P. Serviss in New York Jour-

# Culture.

Culture is a slow process. It comes from long and close contacts. It is the fruit of reflection, of travail of soul and of mind. Grappling with some thing until the very essence of it has been extracted is a first step. Thus the tastes of essences is learned, and once learned lesser distillations do not satisfy. Then follows a growing power to discriminate, to distinguish nice values, to judge of quality, to answer to beauty, to feel the need, that what you have, though it may be little, may still be the real thing. This is culture It is not baggage, like diplomas and de grees. It is not things seen and heard, miles traveled or books rend. These are the materials for culture. They contribute to it only when they are absorbed by the mind and as really lost in it as water and lime, phosphates and ammonia must be lost in the soil if they are to earich it and enable it to increase its yield.--ida M. Turbell in Woman's Home Companion.

A Personal Application.

# Taking to The Boats

Copyright, 1915, by the McClure Newspaper Syndicate.

One hour after noon on the twelfth day of February, 1862, the brig Gull, bound from Liverpool to the Cape of Good Hope, and having forty-eight jouls aboard, burned to the water's edge and sank, leaving us 350 miles off the African coast.

There was some confusion, of course, when we took to the boats, but we got away from the brig in good shape, with no one lost or hurt and with water and provisions enough to do us for a week. We were in charge of the boatswain, and, but for a terrible accident, I know we should have pulled through without mishap or suffering. He was an oldish man, a good sallor, and he had authority over all in the boat. Besides the crew, there were three young men and a woman and a girl. The woman was the girl's aunt.

It had come 9 o'clock or later, and some of the men were asleep, when the boatswain went forward and stood on the thwart with his arm around the mast to steady himself. I think he was tooking about to see if he could find anything of the other boats. Just how it happened no one could tell, though three of us had our eyes on him when he suddenly pitched overboard. We were still pitching briskly sbout and perhaps it was a sharp drive of the boat which sent him to his death. If he rose to the surface he did not call out. He simply went right out of sight and never even called out. Little or nothing was said that night

as to who should command the boat, but morning had hardly dawned when there was a row about it. Being a lad not yet out of my apprenticeship, I was of course out of the question, but each of the other three sailors was determined to act as captain. From words they came to blows, and another horror fell upon us. The three young men were driven into the quarrel, and the six had a savage fight with such weapons as could be laid hold of. It was a dead calm, with the sea quieted down, and a couple of sharks were lying off our port quarter. No one had seen them, nor did through incredibly long imprisonments any one see them until two of the after their dwellings have been over- young men were knocked overboard. whelmed by avalanches. On March 19, It wasn't five seconds before both were 1755, avalanches buried the village of seized and drawn under. This horrid Bergemoletto, in the Italian Alps, and climax to the row cooled the men off

been immured for thirty-seven days in in the back, another badly hurt about

things were settled down breakfast was served out. We had not to exceed two gallons of water and a dozen biscuits, and the day was hot and not a breath of air stirring.

The aunt, as I now heard called Mrs. Morton, took very sick, and we were terrified at our helplessness. She was soon in a high fever and raving.

About 9 o'clock the aunt sank into a stupor from which she never a The weather then at last made ex ed, and all of us slept for some time. We were finally awakened by a woundwater. In his torment he caught sight of the man in the bow, and he rushed forward and seized him. I ran to pull him off, but before I could reach him both had gone overboard. The two other sailors sat up, asked me what happened and then fell back and slum-

ered as soundly as before. It was sunrise when the sailors awoke. With a leader these men would have suffered and endured for a week and made no complaint. They no sooner saw that the calm still continued than they began cursing and threatening, and they looked at the girl so that she cowered in terror. Presently they went forward and sat close together and talked in whispers, and the girl crept over to me and said: "I know what they are planning; they intend to kill me!" I gave her one of the knives and told

her I would protect her to the last. The men talked for an hour or so and then lay down and went to sleep again. I was half mad with hunger and thirst by that time, and I knew the poor girl was, if anything, worse off. We talked in low tones of the good things we had eaten and the springs we had drunk from, and we kept our heads constantly wet with the salt water to alleviate our thirst as far as it could. At 4 o'clock or soon after the men awoke and called to me. They wanted to kill the girl. I reasoned with them and told two or three deliberate falsehoods and finally prevailed upon them to walt another day. I felt they would do so and slept soundly that night. The sun came up next morning the same ball of fire, and any sailor could have told that the calm would last another day. What happened along toward noon I can never distinctly remember, for I had little reason left. There must have been a fight, but I remember none of the detalls. It is like trying to recall a dream of years ago. What I can remember back to was waking up in the cabin of the German steamer Bergen. very ill and very weak. She had picktere two Bring skeletons-the girl and We were alone, and there were "Who are you?" asked the duke in two blood stained knives in the bottom his short and dry manner, jooking up of the boat to deepen the mystery. The

girl pulled through as well as myself, but there was no after romance. She thanked me over and over again with tears in her eyes, but there was no love. She was a lady bred and born, and I was only a poor sailor lad.

Fortifications of New York Harbor. The narrow approaches to the harbor of New York have made the fortification of it a simpler matter than usual. On Sandy Hook is Fort Hancock, with an artillery garrison; on the Narrows, Fort Wadsworth, artillery garrison; on the Staten Island side, Fort Tompkins; across the Narrows, Fort Hamilton. The older Fort Lafayette, between Forts Hamilton and Wadsworth, is now used as a storehouse. On Governors island are Fort Jay, infantry, important barracks and the New York arsenal of the ordnance department. Castle Williams is now a military prison. Fort Totten, artillery post, is on Willet's Point, and directly across from this battery is Fort Schuyler. On Sandy Hook is the proving ground of the ordnance department. A signal corps is stationed at Fort Wood, Bedloe's island.-New York

Information Wanted.

Will some one please give a hint is regard to the whereabouts and the welfare of the family? This honored institution began to disappear a generation or so ago, just about the time that the dissipation of inconveniences attendant upon the rearing of children made families feasible. Ever since the passing away of one room log cabins, abject poverty, home grown wearing apparel and common sense the family has been losing weight and numbers. Its recent complete withdrawal from society has caused grave concern among those who favor the further propagation of the species. If the family will kindly come back and re-establish itself among the race of men no questions will be asked and none

No Such Person.

answered.-Judge.

"The trouble with you," her husband said, "is that you make mountains out of molehills."

"I don't do anything of the kind," she replied. "I want you to understand that my mother brought me up to be a lady, and I know nothing at all about housework. I never made a mountain out of a mole bill in my life. I am perfectly helpless in a kitchen."-New York American.

Shakespeare's Heroines. In Shakespeare's time the parts of heroines were taken by boys, there being no female actors. That is why the poet makes so many of his heroines

# ANTI-KAMNIA TABLETS FOR ALL PAIN

disguise themselves in male attire.

"The efficiency of any drug" says Dr. C.P. Robbins, "is known to us by the results we obtain from its use. If we are able to control pain and disease by means of any preparation, we certhinly are warranted in its use. One of the principal symptoms of all diseases is pain, and this is what the patient most often applies to usfor, i. e. something to relieve his pain. If we can arrest this promptly, the patient is most liable to trust in us for the other remedies which will effect a permanent cure. One remedy which I have used largely in my practice is Anti-kammia Tablets. Many and varied are their uses. I have put them to the test on many occasions, and have never been disappointed. I found them especially valuable for headaches of malarial origin, where quinine was being taken. They appear to prevent the bad after-effects of the quinine. Antikamnia Tablets are also excellent for the headaches from improper digestion; also for headaches of a neuralgic origin, and especially for women subject to pains at certain times. Two Anti-kammia Tablets give prompt relief, and in a short time the patient is able to go about as usual." These tablets may be obtained at all druggists. Ask for A-K Tablets. They are also unexcelled for headaches, neuralgia and all pains.
